### **Chico Sky Watch Announces Poison Skies Alert!**

Chico, CA; March 21, 2011 — Chico Sky Watch is a chemtrail, aerosol spraying and geoengineering awareness and activist group. Our mission is to educate and inform the public and make them aware of the fact that they are being sprayed with aluminum, other toxic heavy metals and chemicals, and possible biological agents. It is paramount that the reasons for this attack on the public be uncovered and it be stopped.

Part of the CSW outreach program includes a presentation of the **documentary film**, "What in the World Are They Spraying?" on Saturday, April 2 at The Pageant Theatre in Chico. Runtime: 1 hour 35 minutes. This film contains both anecdotal and empirical scientific evidence that proves well beyond a reasonable doubt that the issues at hand are severe and must be resolved as soon as possible.

#### **What in the World Are They Spraying?**

Saturday, April 2 at 2:00 pm

The Pageant Theater • 351 East 6th Street, Chico

\$3 – \$5 sliding donation requested

Chico Sky Watch has performed several water tests in Chico and has found as high as 7,000 parts per billion of highly toxic aluminum particulates, over seven times higher than concentrations requiring mandatory EPA action, and over seven thousand times higher than expected levels. **These values should be near zero.** We are awaiting the results of the first of several soil tests where we expect to find similar contamination. These tests will be performed around the Chico area, including Lake Oroville, the Forebay and Afterbay, various streams and rivers, the Paradise / Magalia Reservoir, and other water sources, including rain water. The results will be posted on the CSW website.

Aerosol spraying is occurring on an almost daily basis in California, around the U.S. and the rest of the world, where similar test results of aluminum toxicity contamination are being found. Since the contamination is wide-spread and pervasive, purposeful spraying is the only viable and reasonable source. What you see in the skies above us are **not** "jet contrails"! (or so-called "persistent contrails" — a term that was coined in the 1990's to describe the "**new** phenomenon" that was being seen in our skies) Jet contrails are water vapor exhaust that usually occur above 20,000 feet in altitude and quickly dissipate as the jet travels. (very rare instances can be found as exceptions to the rule) "Chemtrails" are unnatural, man-made sprayed streams that generally occur well-below 20,000 feet, do not dissipate like contrails, and spread out to form "cloud cover". (they also often look "grainy", because they are made of fine particulate matter)

Although the "chemtrail" issue was once seen as a "conspiracy theory", as is often used in the negative, derogatory and irrational senses, various government agencies, including NOAA and NASA, have admitted that they are actively engaged in aerial spraying for various reasons, including combating global warming, among other claims. The U.S. military has openly admitted that they are pursuing "weather control" as a form of potential "weather warfare". Patents have also been found describing various aerial aerosol spraying methods to achieve various goals.

Chico Sky Watch is asking concerned citizens to join us now to help stop this attack on our health, our populace, our children, our food, and our environment (air, water, & soil). **Spread the Word.** It must stop now!
